

What just the education cost will be for the illegal Children

If you have children or grandchildren these data and information should be important to you. These data and information are easy to verify. Go to the internet or do the math yourself.

The current national debt is between 17 and 18 billion dollars.

Most economist project the debt will reach 20 billion in the next 2 years. I'll send more information on this later.

The last report of the number of illegal children in the country is about 90 thousand and it will reach 149 thousand next year unless immediate action is taken which is unlikely.

The reported cost of education per child in public schools in 2013 was \$13,041. According to a study by Cato the real cost is about 44 percent greater than the schools report.

Why should you be concerned it's the government's problem? Yes but you and your children are going to pay for it. The state governments will pay, 45.6, percent, the local districts 37.1 %,the federal government 8.9 percent(your income tax) and the balance of 8.9 percent will come from private sources.

Let's see how much, just education, is going to increase our debt? The national government will have to borrow the money to pay for its portion, but we local tax payers don't have that option as a group.

Let's start out with the 90 thousand that here now

$13041 \times .371 = 4838.21$  amt. extra you will have to pay tax on for each additional kid in school at the local level

$90,000 \times 13,041 = 1,173,690,000$  cost to tax payers this year.

$149000 \times 13041 = 1,943,109,000$  projected cost to tax payers next year.

This will be additional education cost to tax payers as it will be above what we pay for legal children. But it is probably only a small percent of the total cost per child when you consider all benefits they need and will receive,
