

The measure is the total number of confirmed COVID-19 cases per million people.

United States: 2,220.79

Sweden: 1,368.61

Norway: 1,288.27

Denmark: 1,250.3

The differences among Sweden, Norway and Denmark are not significant, Jennifer Kates, director of global health and HIV policy at the Kaiser Family Foundation, told PolitiFact.
